GENERAL NOTES OF SOCIETY.

Personal Items of Interest About Topeka People and Visitors in Town.

There is a young woman in Topeka who will go to Chicago soon to become a trained nurse.

Women who wear weasels and squirrels and other small deer about their necks this winter proclaim that they bought them at the bargain counter. The new boss have tails at each end like the Irishman's elephant.

There is a young man in town who has called on his fiancée 200 nights in succession.

Pin cushions are all the style now just as they used to be in the days of long ago. They are covered with chintz, mounted on decorated china and filled with almond meal.

There are three people who, if they don't make a living, at least supply themselves with pocket money by beating car conductors out of change. Although many of these individuals are men, the majority of them, according to the victimized conductors, are women. The method is a simple one. The operator will select a crowded car, and preferably enter it with other chance passengers. She assuming that it is a woman will seat herself unobtrusively and pay her fare with a nickel. After riding a dozen blocks or so she will intercept the conductor at a moment when his manifold duties have put him most off his guard and say in the sweetest tones, "Where is my change, please?"

The conductor's instinct is to say, "I gave you your change," but perhaps he is more cautious and says, "You gave me a nickel." Anyway, she insists—sometimes it is a dime, sometimes a quarter, and sometimes even a half dollar—and almost always carries her point.

The winter girl is all wings. This does not imply she is an angel by any means, but rather a creature of materialistic capacities, for to arrive at her winged state means long sieges with dressmaker and milliner. Behold, however, the result. There are wings on her hat, wings on her neck, wings on her shoulder, and if you look close you may discover wings on her heels, like Mercury's, for she flies along the ground a picture of light and leading. Some people do not like the winter girl's costume, and one in a thousand declares today that she resembles in silhouette a half-closed umbrella—all points and angles. But he is hypercritical and wouldn't like anything new, not even the girl herself. If any one attempts to be facetious about the funny little frills on your crushed velvet collar, dear girl, and proposes to use the same as handles to carry off your dainty heads, remind the witless person it cannot be lost so easily as that.

The girl who hasn't a new gown for the Assembly party this evening is touching up her old one with a half dozen of devices. It is the "sweetest" event up to date.

If the suffrage amendment carries the active women of this city will fall on each other's necks and forget all the hard work and the discomforts of the campaign, but if it is given a blow they will look at each other with blank faces and say, "How are we going to pay our debts?" for the Populist and Republican women have spent more money in the campaign than they had. There are 1,000 Populist women who have agreed to ride in the parade in the morning to show their allegiance to the cause. Mrs. Ota, Mrs. Wardall and Mrs. Furbeck have polled every ward in the city.

Dana Gibson's pictures in Life. The participants will be society young people in town and there are a number who bear enough resemblance to Gibson's well known figures to make it an entertaining affair. A Wonderful Banjoist.

There were only about one hundred people at Library hall last night to hear A. A. Farland, the banjoist but they are all loud in their praise of him this morning. He was assisted by some good local musical talent and the show was interesting throughout. He was very much disappointed in his audience and some of his admirers have induced him to appear again on Monday night at the same place. He is said to be a wonderful banjoist.
